

Fund objective

The fund is a standard money market fund with a variable intrinsic value and can invest, directly or indirectly, in money market instruments denominated in euros and with a weighted average remaining time to maturity of up to one year. The investment process seeks, in the first place, to protect the capital and to add value by pursuing an active policy regarding duration and selection of countries, industries and individual money market instruments. The fund complies with the requirements set out in the Money Market Fund Regulations ("Verordening Geldmarktfondsen"). The fund is not a guaranteed investment and does not charge external aid to guarantee the liquidity of the Fund.

This report is based on the so-called "look through" principle. In other words, by looking through the Investment funds insight is provided in the positions of the securities at the lowest level. Via Aegon you also may invest, directly or indirectly, in funds that are not administered by Aegon. We would point out that the funds that are not administered by Aegon, are not included in the look through reports. Therefore we are unable to deliver a complete "look through". Consequently, we may not be able to give you full insight in the risks of your investments based on these reports. Please revert to our website for a glossary and the prospectus.

The risk of the Money Market Fund is different from an investment in deposits, as the principal invested can fluctuate. The Money Market Fund does not rely on external support for guaranteeing the liquidity or stabilising the NAV per unit or share and the risk of loss of the principal is to be borne by the investor. The Money Market Fund is not a guaranteed investment. In principle, assets for this fund are valued mark-to-market. More information on the valuation of specific asset types can be found in the fund's prospectus.
