### Aegon Emerging Markets Debt Fund (the “Fund”) Z EUR Hedged Acc (ISIN IE00BZCNV081)

This is a sub-Fund of Aegon Asset Management Europe ICAV (the “ICAV”).

#### Objectives and investment policy

**Objective:** The investment objective is to provide long term capital growth.

#### Investment policy:

The Fund will seek to achieve its investment objective by investing at least 67% of its net assets directly or indirectly, in fixed income securities as listed below in US Dollars issued by governments, institutions or companies in emerging countries which may be fixed and floating rate. The Fund considers an “emerging market” (**Emerging Market**) to be any country in the J.P. Morgan Emerging Markets Bond Index Global Diversified. In considering possible emerging countries in which the Fund may invest, the Investment Manager will place particular emphasis on factors such as economic conditions (including growth trends, inflation rates and trade balances), regulatory and currency controls, accounting standards, and political and social conditions. Within Emerging Market investments, the Fund seeks to participate in the more established markets which the Investment Manager believes provide sufficient liquidity.

The Fund may invest in government bonds, issued both by governments in developed markets and by governments in Emerging Markets, high-yield and investment-grade corporate bonds and liquid assets (such as cash and/or cash-like securities, for example, UK gilt-edged securities or money market instruments).

**Other information:** You can buy, sell or exchange the Fund's shares on any business day (see 'Key Information for Buying and Selling' in the Fund Supplement to the Prospectus for more information). Income the Fund receives will be reinvested and automatically reflected in the value of your shares.

#### Risk and reward profile

The risk/reward profile shows the risk of investing in the Fund, based on the rate at which its value has changed in the past. The Fund has been categorised as 4 because bond funds in general are less volatile than equity investments. Corporate bonds are considered more risky investments compared to government bonds. The Fund’s risk and reward category is not guaranteed to remain unchanged and may shift over time. It is calculated using historical data, which may not be a reliable indication of the future risk profile of the Fund. Category 1 does not mean 'risk free'. The following risks, which are not, or are not fully, reflected in the risk/reward profile are also relevant to the Fund.

**Credit risk:** The Fund is subject to credit risk in respect to its investments and with regard to its contractual counterparties (such as hedge providers).

**Liquidity risk:** The secondary market for sub-investment grade bonds is typically much less liquid than the market for investment grade bonds, frequently with significantly more volatile prices and larger spreads between bid and asked price in trading.

**Interest rate risk:** The Fund's exposure to market risk is mainly with regard to movements in the value of its investments, changes in interest rates that in the event the Fund makes any fixed interest investments, may decrease its net interest income. In the event of a general rise in interest rates, the value of certain investment in the Fund's assets may fall, reducing the net asset value of the Fund.

Full details of risks are disclosed in the 'Risk Factors' section of the Fund Supplement to the Prospectus and the Prospectus.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest		
Entry charge	0,28%	This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out. The entry and exit charges shown are the maximum figures, and in some cases you may pay less.
Exit charge	0,28%	You can find out the actual entry and exit charges from your financial adviser or distributor.

Charges taken from the fund over a year		
Ongoing charges	0,05%	The ongoing charges figure shown here is an estimate of the charges. This is based on the anticipated expenses for one year. The ICAV annual report for each financial year will include detail on the exact charges made. The ongoing charge excludes any portfolio transaction costs (except in the case of an entry/exit charge paid by the Fund when buying and selling shares in another fund).

Charges taken from the fund under certain specific conditions		
Performance fee	None	

More detailed information on charges can be found in the 'Fees and Expenses' section of the Fund Supplement to the Prospectus and the Prospectus.

## Past performance

The Fund was launched in 2017 and therefore there is insufficient data to provide a useful indication of past performance.
