### Aegon European Government Bond Fund (the “Fund”) Z EUR Acc (ISIN IE00BZCNTW65)

This is a sub-Fund of Aegon Asset Management Europe ICAV (the “ICAV”).

#### Objectives and investment policy

**Objective:** The investment objective is to provide long term capital growth.

#### Investment policy:

The Fund will seek to achieve its investment objective by investing at least 67% of its net assets directly or indirectly, in government bonds and government related bonds such as municipalities, supra-national organisations (fixed and/or floating rate) of countries belonging to the European Union and in countries in the process of negotiating accession to the European Union with the European Commission (such as Bosnia and Herzegovina, Serbia and Turkey). The Investment Manager aims to add value by active selection of the weighted average life of bonds (average length of time until repayment of the principle invested) and specific bonds in the portfolio as well as active selection of issuers, issues, countries, sectors, ratings and maturity buckets. All active selections are based on the outcome of top-down and bottom-up research in which government bond markets are assessed along the lines of four dimensions: fundamentals (assessment of economic cycle and monetary policy), valuation (valuation of government bond markets), technical (assessment of technical indicators of the government bond market like interest rates, curves) and sentiment (investor positioning, risk aversion and political developments). Investments will not be made by the Investment Manager if the Investment Manager's aim will not be met following the top-down and bottom-up research and a assessment based on the four dimensions.

**Other information:** You can buy, sell or exchange the Fund's shares on any business day (see 'Key Information for Buying and Selling' in the Fund Supplement to the Prospectus for more information). Income the Fund receives will be reinvested and automatically reflected in the value of your shares.

#### Risk and reward profile

The risk/reward profile shows the risk of investing in the Fund, based on the rate at which its value has changed in the past. The Fund has been categorised as 3 because bond funds in general are less volatile than equity investments. The Fund's risk and reward category is not guaranteed to remain unchanged and may shift over time. It is calculated using historical data, which may not be a reliable indication of the future risk profile of the Fund. Category 1 does not mean 'risk free'. The following risks, which are not, or are not fully, reflected in the risk/reward profile are also relevant to the Fund.

**Interest rate risk:** The Fund's exposure to market risk is mainly with regard to movements in the value of its investments, changes in interest rates that in the event the Fund makes any fixed interest investments, may decrease its net interest income. In the event of a general rise in interest rates, the value of certain investment in the Fund's assets may fall, reducing the net asset value of the Fund.

Full details of risks are disclosed in the 'Risk Factors' section of the Fund Supplement to the Prospectus and the Prospectus.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest		
Entry charge	0,025%	This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out. The entry and exit charges shown are the maximum figures, and in some cases you may pay less.
Exit charge	0,025%	You can find out the actual entry and exit charges from your financial adviser or distributor.

Charges taken from the fund over a year		
Ongoing charges	0,05%	The ongoing charges figure shown here is an estimate of the charges. This is based on the anticipated expenses for one year. The ICAV annual report for each financial year will include detail on the exact charges made. The ongoing charge excludes any portfolio transaction costs (except in the case of an entry/exit charge paid by the Fund when buying and selling shares in another fund).

Charges taken from the fund under certain specific conditions		
Performance fee	None	

More detailed information on charges can be found in the 'Fees and Expenses' section of the Fund Supplement to the Prospectus and the Prospectus.

## Past performance

The Fund was launched in 2017 and therefore there is insufficient data to provide a useful indication of past performance.
