

Key investor information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Aegon Emerging Markets Debt Fund Euro Class Z Acc Hedged (The "Fund") (IE00BZCNV081). This is a sub-Fund of Aegon Asset Management Europe ICAV (The "ICAV"). The Fund is managed by Aegon Investment Management B.V..

Objectives and investment policy

Objective: The investment Policy is to achieve a higher total return performance than the Benchmark Performance

Investment policy: This fund is actively managed. The Fund will seek to achieve its investment objective by investing at least 67% of its net assets directly or indirectly, in fixed income securities as listed below in US Dollars issued by governments, institutions or companies in emerging countries which may be fixed and floating rate. The Fund considers an "emerging market" (Emerging Market) to be any country in the J.P. Morgan Emerging Markets Bond Index Global Diversified. In considering possible emerging countries in which the Fund may invest, the Investment Manager will place particular emphasis on factors such as economic conditions (including growth trends, inflation rates and trade balances), regulatory and currency controls, accounting standards, and political and social conditions. Within Emerging Market investments, the Fund seeks to participate in the more established markets which the Investment Manager believes provide sufficient liquidity. The Fund may invest in government bonds, issued both by governments in developed markets and by governments in Emerging Markets, high-yield and investment-grade corporate bonds and liquid assets (such as cash and/or cash-like securities, for example, UK gilt-edged securities or money market instruments). The Fund may invest in financial derivative instruments for investment purposes and for the purposes of efficient portfolio management or hedging purposes. The benchmark of this fund is JP Morgan Emerging Markets Bond Index Global Diversified (Hedged). The fund is actively managed in relation to the benchmark.

Other information: Participants can enter or exit the Fund on a daily basis at the intrinsic value of the participation in the Fund. When applicable, the fund will charge a mark-up for subscriptions or a mark-down for redemptions. The Fund does not distribute any dividend. Income received is re-invested. The Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and reward profile

The risk/reward profile shows the risk of investing in the Fund, based on the rate at which its value has changed in the past. The Fund has been categorised as 5. The Fund's risk and reward category is not guaranteed to remain unchanged and may shift over time. It is calculated using historical data, which may not be a reliable indication of the future risk profile of the Fund. Category 1 does not mean 'risk free'.

Credit Risk: The Fund is subject to credit risk in respect to its investments and with regard to its contractual counterparties (such as hedge providers).

Liquidity Risk: The secondary market for sub-investment grade bonds is typically much less liquid than the market for investment grade bonds, frequently with significantly more volatile prices and larger spreads between bid and asked price in trading.

Interest Rate Risk: The Fund's exposure to market risk is mainly with regard to movements in the value of its investments, changes in interest rates that in the event the Fund makes any fixed interest investments, may decrease its net interest income. In the event of a general rise in interest rates, the value of certain investment in the Fund's assets may fall, reducing the net asset value of the Fund.

Full details of risks are disclosed in the 'Risk Factors' section of the Fund Supplement to the Prospectus and the Prospectus: Aegon Asset Management Europe ICAV.

Key investor information

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
