

Self-certification form to establish foreign (tax) status

Registration of entity data

Based on the <u>CRS</u> and the <u>IGA</u> which is concluded for <u>FATCA</u> purposes, Netherlands law requires financial institutions to collect and review information to identify the tax residence or multiple tax residences (if any) of entities and/or controlling persons. As a financial institution we therefore have to ask you several questions. If an entity and/or any of its controlling persons is a U.S. person, or if the tax residence / residences of entities and/or controlling persons are outside the Netherlands in a participating country, we are legally bound to report the data of the entities and/or controlling persons to the Netherlands Tax and Customs Administration. They will report the data to the tax authorities of each relevant participating country and/or the United States. For further information, for example about the participating countries, we refer to www.belastingdienst.nl.

Several terms in this form are <u>underlined</u>. Please find an explanation of these terms in the glossary.

An operating company which generates 50% or more of its gross income from active operations (as opposed to investments). In this respect, a financial institution is not an active operating company.

Assets

The total of all possessions of an entity.

Authorized

An authorized representative is authorized to sign statements or conclude contracts on behalf of the entity. The authorized representative is determined by the legal form of the entity or appointed by the entity. Is the entity registered with the Chamber of Commerce? Then the authorized representative will also be registered with the Chamber of Commerce. You will find this on the Chamber of Commerce extract.

Central bank

This means an institution that is by law or government sanction the principal authority, other than the government of the country itself, issuing instruments intended to circulate as currency. Such an institution may include an instrumentality that is separate from the government of the country, whether or not owned in whole or in part by the country.

Certified deemed-compliant FFI

A certified deemed-compliant FFI is a <u>financial institution</u> which must comply with the <u>FATCA</u> regulations. However, this institution does not have to register with the United States tax authorities (IRS) to receive a <u>GIIN</u>. Instead it certifies to other financial institutions that it is compliant with the requirements of a certified deemed-compliant FFI according to FATCA. This also applies to institutions that have been included as deemed-compliant financial institutions in Annex II of any IGA. FATCA contains four categories of certified deemed-compliant FFIs:

- 1. certified deemed-compliant non-registering local bank;
- 2. certified deemed-compliant FFI with only low value accounts;
- 3. certified deemed-compliant sponsored, closely held investment vehicle;
- 4. certified deemed-compliant limited life debt investment company.

If you are uncertain whether the entity could qualify for a certified deemed-compliant FFI status, please consult a tax advisor.

- can exercise more than 25% of the voting power at the shareholders meeting of the entity;
- has direct or indirect control or power of decision in the entity;

- is entitled to a share in the profits of the entity of more than 25%;
- has direct or indirect control or power of decision in the entity;

The above-mentioned description of a controlling person is derived from the definition as laid down in the Wwft (Wet ter voorkoming van witwassen en financieren van terrorisme). Please find the complete definition as incorporated in the Wwft on www.wetten.overheid.nl.

Is the entity a trust?

- B. the United States or any of its agencies or instrumentalities.
- C. a state, the District of Columbia, a possession of the United States, or any of their political subdivisions or instrumentalities.

FATCA

FATCA is an abbreviation of Foreign Account Tax Compliance Act. This United States tax legislation is aimed at identifying U.S. persons that hold accounts or financial assets outside of the United States. The government of the Netherlands has concluded an agreement with the government of the United States with respect to the exchange of information regarding:

- U.S. persons holding financial accounts in the Netherlands, and
- Netherlands residents holding financial accounts in the United States.

Financial institution

There are 4 types of financial institutions.

- 1. **custodial institution:** an entity that holds, as a substantial portion of its business, financial assets for the account of others (mostly clients). An entity holds financial assets for the account of others as a substantial portion of its business if the entity's gross income attributable to the holding of financial assets and related financial services equals or exceeds 20% of the entity's gross income during the shorter of:
 - three years prior to the current year;
 - the period since the establishment of the entity.
- 2. **depository institution:** an entity that accepts deposits in the ordinary course of a banking or similar business. For example, a bank or a financial lease company.
- 3a.investment entity: an entity that primarily conducts as a business one or more of the following activities or operations for or on behalf of a customer:
 - trading in money market instruments (cheques, bills, certificates of deposit, derivatives, etc.); foreign exchange; exchange, interest rate and index instruments; transferable securities; or commodity futures trading;
 - individual and collective portfolio management; or
 - otherwise investing, administering, or managing funds, money, or financial assets on behalf of other persons.
- 3b.**investment entity:** an entity the gross income of which is primarily attributable to investing, reinvesting, or trading in financial assets, if the entity is managed by another entity that is a type 1, 2, 3a, or 4 financial institution.

Note: An investment entity includes an entity that functions (or holds itself out) as an investment fund, such as a private equity fund, venture capital fund, leveraged buyout fund, or any investment vehicle whose purpose is to acquire or fund companies and then hold interests in those companies as capital assets for investment purposes.

4. **specified insurance company:** an entity that is an insurance company (or the holding company of an insurance company) that issues, or is obligated to make payments with respect to, a cash value insurance contract or an annuity contract.

If you are uncertain whether the entity is a financial institution, please consult a tax advisor or visit www.rijksoverheid.nl.

GIIN (Global Intermediary Identification Number)

The GIIN is a global reference number of the United States tax authorities (IRS). The IRS will assign this number to financial institutions and certain other entities for identification purposes. You may request this number via www.irs.gov. In some cases only the sponsoring entity of the financial institution has a GIIN. For the purposes of this form it is only then allowed to provide the GIIN of the sponsoring entity.

Governmental entity

This means the government of a country, any political subdivision of a country (which includes a state, province, county, or municipality) or any wholly owned agency or instrumentality of a county or of any one or more of the foregoing.

Group

A group is comprised of all the individual companies that are affiliated with other companies in the same group. Entities are affiliated if:

- 1. one of the entities controls the other entity; or
- 2. the entities are all controlled by the same entity.

In this respect an entity is 'controlled' if:

- an individual or legal entity in the group has a direct or indirect majority interest in the entity; or
- an individual or legal entity in the group has a direct or indirect majority vote in the entity.

Holding company

A holding company is an entity that functions as a (central) holding or controlling company for the underlying subsidiaries. The holding company controls and manages the shares of the entities in the group.

An entity is not a holding company if it functions (or holds itself out) as an investment fund, such as a private equity fund, venture capital fund, leveraged buyout fund, or any investment vehicle whose purpose is to acquire or fund companies and then hold interests in those companies as capital assets for investment purposes.

IGA

An IGA is an intergovernmental agreement with the United States to facilitate compliance with the FATCA rules.

International organization

This means any international organization or wholly owned agency or instrumentality thereof. This category includes any intergovernmental organization (including a supranational organization) (1) that is comprised primarily of governments; (2) that has in effect a headquarters or substantially similar agreement with the country; and (3) the income of which does not inure to the benefit of private persons.

Non-participating FFI

Any Financial Institution that is located in an IGA jurisdiction generally cannot be a non-participating FFI. Only if the FFI has received notification of the fact that it is a Non-Participating FFI, this would be different. Such notifications will only apply from 2017, at the earliest. In all other situations, an FFI in an IGA jurisdiction does participate according to the FATCA regulations, is certified deemed-compliant, or an exempt beneficial owner.

The term non-participating FFI means a <u>financial institution</u> other than:

- a <u>financial institution</u> that is participating according to <u>FATCA</u> regulations;

Qualified intermediary

A qualified intermediary is an entity that has a QI agreement with the U.S. tax authorities.

Regularly traded on one or more established securities markets

An entity is considered to be regularly traded on one or more <u>established securities markets</u> if at least 50% of the <u>securities</u> of the entity are <u>regularly traded</u> on an established securities market.

Established securities market

An established securities market/recognized stock exchange is a stock exchange which is officially recognized or ratified by a government institution of the country in which the stock exchange is incorporated. The stock exchange should be under the supervision of this governmental body. A stock exchange is considered established if a meaningful quantity of stock is being traded annually.

Regularly traded securities

Securities are considered regularly traded on a stock exchange if there is a continuously meaningful volume of trade in these securities. However, there is an exception to this rule: an interest (share, stock etc.) in a financial institution is not considered regularly traded if the holder of the interest (other than a financial institution that acts as an intermediary) is registered in the accounts of this financial institution.

In cases where interests have been registered in the accounts of the financial institution prior to July 1, 2014 the interests will qualify as regularly traded securities. In cases where interests have been registered in the accounts of a financial institution on or after July 1, 2014, the interest will also be treated as regularly traded securities until December 31, 2015. Interests that have been registered in the accounts on or after July 1, 2014 will not qualify as regularly traded securities as of January 1, 2016.
